

## **Vehicle Parts**

The benefits of owning genuine parts from Cycle & Carriage far outweigh the cost savings non-genuine parts might offer you.

### **Genuine Parts**

- Structural integrity of genuine parts meets factory original standards
- Genuine parts are made to fit properly, helping your vehicle retain its original look
- Covered under vehicle warranty
- Designed to work with all other parts of the engine and drive train
- Genuine parts can maintain & improve the condition of the car, making it last longer and perform better
- Optimised & guaranteed functional reliability

### **Non-Genuine Parts**

- Safety, composition and resistance of parts are unknown
- Non-genuine parts are reverse engineered and additional holes may be drilled. The parts may also be contorted to make them fit properly
- No warranty covers liabilities related to the use of non-genuine parts or system failure caused by the use of non-genuine parts
- Runs risk of excessive wear and breakdowns that may be costly to repair
- Non-genuine parts are often badly dimensioned copies of genuine parts
